

Barracuda®

## Important Notice Restrained Joint Gaskets

Specification Rubber Products has manufactured rubber components for the waterworks industry since 1968. Over the years we have established our company as a primary supplier of quality gaskets and sealing solutions for various ductile iron pipe, valve and hydrant manufacturers and distributors. These manufacturers have and still do rely on Specification Rubber Products to provide products that they feel comfortable selling to their customers/end users.

Specification Rubber Products has now expanded its product line with the introduction of its Barracuda® restrained joint gasket. Like the other products that Specification Rubber Products has manufactured for decades, the Barracuda® gasket is manufactured in accordance with ANSI/AWWA C111/A21.11 Rubber Gasket Joints for Ductile Iron Pressure Pipe and Fittings. Specifically:

- The Barracuda® gasket meets or exceeds ANSI, AWWA and UL requirements.
- The Barracuda® gasket is manufactured in accordance with Specification Rubber Products' stringent and rigorous ISO certified quality system.
- The Barracuda® gasket is NSF-61 certified in SBR, NBR, EPDM and FKM (Viton®). SBR gaskets are molded in "Safety Orange," which distinguishes them from all other push-on restrained joint gaskets in the marketplace.
- The Barracuda® gasket, when properly installed according to Specification Rubber Products' assembly instructions, is rated up to 350 psi.
- The Barracuda® gasket is intended for ductile iron pipe, valves and fittings having the Tyton® joint<sup>1</sup>.
- The Barracuda® gasket is proudly manufactured in the USA.

Specification Rubber Products is so confident in the quality of its newest product that it provides a warranty against manufacturing defects associated with material or workmanship for one (1) year, just as it does for its more than 600 different gaskets and sealing solutions offered to the waterworks industry. In fact, this is the same warranty Specification Rubber Products has offered for more than 47 years.

Specification Rubber Products' products are made and shipped the Right Way, supported with exceptional customer service. Specification Rubber Products will seek to provide the customer with a quick and easy resolution of any issue and will treat all claims consistent with our industry leading customer and technical approach.

We look forward to continuing to serve our valuable customers by providing the most reliable and highest quality products in the industry. If you have questions, please reach out to us at 800-633-3415 or visit us online at [www.specrubber.com](http://www.specrubber.com).
