Re: Build America, Buy America Compliance

To Our Valued Customers:

Specification Rubber Products, Inc. proudly manufactures all of its products in the United States from materials originating in the United States. In rare instances, Specification Rubber Products will use a third party to manufacture products. Specification Rubber Products provides its vendors with materials originating in the United States, and its vendor manufactures the product in the United States. As a result, our products exceed the requirements of the Build America, Buy America Act, 41 U.S.C. §§ 1908, 8301-8303.

Specification Rubber Products certifies that it does not sell any products not manufactured in the United States and that all its products are manufactured using materials originating in the United States.

Very Respectfully,

Matt Haan
National Sales Manager - Waterworks
